Intelligent Asset and Cash Management System

The oneCheck® solution is a value added product extension of the CashCode one™. By utilizing the CashCode one™ bill validator with your existing TITO printer, our cash management solution combines best in class validation technology with quick & efficient printer technology – all in one. Solve player disputes in minutes, print separate performance and firmware reports for your printer and validators. Manage your cashbox contents and eliminate daily variances.

oneCheck™ solution features:

- Works with all leading dual port TITO printers
- Provides Last Five Bills Report
- Provides Validator and Printer Statistics Report which can be used to track their performance
- Prints Cashbox Audit and Performance Report
- Web based SQL Database provides trends and overviews on a daily basis direct on your PC

CashCode one™ features:

- Universal product supports any currency, any voltage and any protocol
- Bill and ticket acceptance rate of 98%+
- Fastest validation speed in the industry
- 4-way barcode ticket insertion
- GDS compatible device
- USB service port and firmware download

Customer convenience:

- Eliminate needs for cash box asset tracking
- Significantly improve variance reconciliation efficiency
- Control your bill validator performance, using source data
- Easy and transparent bill validators firmware management

The Onecheck™ solution instantly provides access to 3 independent reports, making your casino more efficient:

Type of Report	Action	When Used	Benefit
Last Five Bills Inserted	Press validating head removal latch twice	Customer claims that they did not get credit for last inserted bill or voucher	- Instantly confirm the last five notes/tickets inserted - Cashbox verification not required - Increase customer loyalty
Performance Report	Press validating head removal latch four times	Used for on-the-spot current validator and printer firmware versions and to verify the performance of both peripherals	- Manage your repair work order or PM program - Minimize machine downtime during investigation - Floor management made easy
Cashbox Audit and Performance Report	Depress validating head latch for two seconds	Instantly receive information on the cashbox contents and machine performance	- Daily dash board in your email - Direct real time web access to your custom database - Track and compare revenue by machine / location - Reduce investment for 2nd cash box

Connect CashCode one™ validator and TITO printer

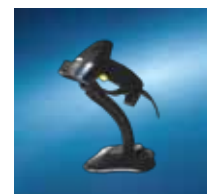

Choose your report and press validator head's lever

Tool free reports prints automatically

Feed Ticket into validator

Back Office opens cashbox and scans oneCheck® ticket, data is available for viewing on any network PC

We can provide revenue and performance reports with the press of a button and the database information can be viewed from anywhere your PC is web-connected.
