# First proven compact bill recycler

**The Bill-to-Bill™ 60 is a proven, highly efficient single denomination bill recycler. Incoming cash can be stored in the recycling module and be issued as change to the next customer.**

**Profitability:**

- Requires less coins in hoppers - improving cash flow by up to 50%
- Recycling lowers operating costs due to less service calls for coin replenishments
- Reduction in coin depletion drives higher machine uptime resulting in increased revenue
- Fast transaction speeds, approximately 2.5 secs to stack
- High first time acceptance rate of more than 98%

**Reliability:**

- Leveraging CashCode's proven Bill-to-Bill™ recycling technology – over 5 years experience, over 5000 units deployed
- Patented sensor systems guarantee highest fraud bill rejection
- Additional Multi-sensor anti stringing protection
- Low operating costs due to beltless transport system

**Flexibility:**

- Single and Multi-width version supports currencies from 62 to 78 mm widths
- Configurable front bezels lighting for best end-user attraction
- Selectable cashbox – 300, 400 or 700 bills to best fit application
- Configurable escrow mode

**Features:**

- Industry leading 60 note capacity single denomination recycling system
- Dynamic bill counter visible through 2 digit LED display
- BlueChip™ Sim Card for quick configuration changes & firmware updates
- Accepts and returns 5-50€
- 4 way bill validation for easy use
