

MANAGING PERFORMANCE FROM THE FLOOR TO THE BACK ROOM

MEI EASITRAX® Soft Count is an integrated software/hardware solution that extends the security and acceptance offered by MEI CASHFLOW® SC into a casino soft count room. Information collected in the bill validator is now easily accessible in a database that can be networked to multiple locations and be accessed to analyze slot performance.

RFID technology connects slot machine asset numbers to a specific cashbox. Casino operators can streamline the cash management process through:

- A design easily retrofitted to all existing MEI CASHFLOW® systems. Simplified kits have been developed to ensure an easy installation.
- Integrated with existing counter/sorter equipment to maximize efficiencies by minimizing system components.
- Accountability without manual intervention. The ability to track the scheduled drops of all cashboxes provides a fast, efficient source to validate revenue and, as a result, ensures a more accurate collection process.

Please contact your MEI sales associate to learn how MEI EASITRAX® Soft Count can help you eliminate "hot boxes," jurisdictional fines, dedicated cashboxes and increase operational efficiencies.

MEI EASITRAX®
Antenna Board

MEI EASITRAX®
Reader Base

Description	Part Number	Components
Upgrade Kit	91702200P10	Antenna board 10 RFID tags 10 standoffs 10 labels
TAG kit	62549890P10	10 RFID tags 10 labels
Kit standoffs	252062140P30	30 standoffs
Spare cashboxes	50086190P12	12 cashboxes 12 RFID tags 12 labels
Soft Count kit	252066165	software 2 reader bases
Reader base	252060141	reader base

MEI EASITRAX® SOFT COUNT SYSTEM

How it works

Features

Advantages

Benefits

Streamlined engineering	Easy retrofit to all existing MEI CASHFLOW® systems; reliable communication without batteries or wires	Kits will ensure simple and efficient installation
Back room system interface with existing process/counting systems	Integrates with existing back room equipment	Flexibility to choose the soft count equipment that best fits your needs
SQL database record storage	Central data repository for individual workstations or network	Database mining to evaluate and improve operations
Information accessibility	Track performance, acceptance rate and note acceptor software revisions by machine	Maximize operational efficiency and profitability
Automated connection between slot machine and cashbox	Use of RFID eliminates writing and wandering	Reduced drop team labor and increased accuracy
"Hot box" detection	Note acceptor will not enable live cashbox	Eliminate time and cost associated with "hot box" search
Validate drop	Automatically verify all boxes were collected and detect unexpected boxes	Reduce variances and quickly locate errors by asset number
Incremental accounting system	Fast access to games revenue data, quickly resolve count variances	Additional source for revenue validation (verifying SDS and counter machine)
