

# GIVE YOUR BUSINESS AN ADVANTAGE WITH 5IN1 ECASH ACCEPTORS

## Offer your customers a wider choice for making a purchase and increase your sales.

The vending industry has seen a significant growth in cashless transactions in the recent years. Credit and debit cards are rapidly becoming an important consumer payment option.

With the 5in1 acceptor from MEI your vending machines can accept any payment type the consumer has in their wallet: notes, chip & pin cards, mag stripe cards, NFC payments and contactless cards. Your customers are more likely to make a purchase increasing your sales and helping you maximise the revenue from machines in high-traffic locations. Another option without the notes acceptor is also available.

### Consumer convenience:

- Attractive payment unit with easy to follow instructions for convenient, fast and secure transactions
- More choice for making a purchase: notes, credit and debit cards or NFC
- Transaction can be cancelled with one touch of a button
- High contrast, easy to read display

### Operator friendly:

- One product for accepting 5 payment types
- Increased sales and higher site retention
- 5in1 defaults to the lowest cost transaction
- Compatible with other payment systems in your field base

### Simple installation:

- Choice of 2 variants: with and without notes
- The 5in1 range fits into the standard bill validator slot – no additional openings required on the machine
- The 5in1 can be easily retrofitted onto the existing CashFlow® 2000 bill validators in your field base

### Reliability:

- 5in1 features CashFlow® 2000 – the industry's best-selling bill validator – ensuring reliability and a high bill acceptance rate.
- EMV approved

**Call us today or visit [www.meigroup.com](http://www.meigroup.com) to see how the 5in1 and the 4in1 acceptors can increase your customers' satisfaction and your bottom line.**

**Complete Electronic Payment Solution with Advance 5000**

Providing all the hardware you need to accept electronic payments MEI introduces the Advance 5000. The ultimate solution for vending that increases payment choice and opportunity for purchase for consumers and improves control and sales for operators.

The combination of 5in1 & 4in1 acceptors and Advance 5000 is a simple way of providing cash and cashless payment options to your customers. Advance 5000 provides connectivity to your vending machines allowing you to process transactions through an efficient communication network. When combined with an MEI approved financial services supplier, the solution is complete.

**TECHNICAL DETAILS:**

- Operate over full vending temperature range
- Data encryption for secure transactions

**COMPATIBILITY:**

- Existing payment systems: coin managers CF7000 or CF8000
- Vending management software

**ADVANCE 5000 TECHNICAL DETAILS**

- Modular design for ease and flexibility of upgrades
- LED lights for fast, user friendly diagnostics
- Programmable through a menu of setting buttons
- MDB Interface

**ADVANCE 5000 COMPATIBILITY**

- WAN/LAN/Ethernet
- Industry standard interfaces: PCMCIA, USB, USB Micro, Serial
- SD card

**SYSTEM BENEFITS:**

Ideal option for offering both cash and cashless payments without having to cut additional holes in the machine

No need to deal with multiple suppliers – MEI is your single point of contact for full range of payment solutions

Increase sales and site retention - more payment options means fewer lost purchases due to lack of cash

5in1 Installs in existing CashFlow® 2000 mountings

Perfect choice for public, high traffic locations

Flexible Communications Network

Secure network communications
